GumboNet Standard: Commodity Haulage - Diesel Delivery

Product Description

The Diesel Delivery Smart Contract automates approvals of delivery tickets for diesel and other fuel using SCADA data, applies agreed pricing and business rules and creates configurable, pre-reconciled AR and AP invoices. The smart contract automates the review, audit and approval of the charges, removing up to 95% of the manual touches required by existing digital (but manual) systems. In field trials the smart contract has achieved up to 95% automation.
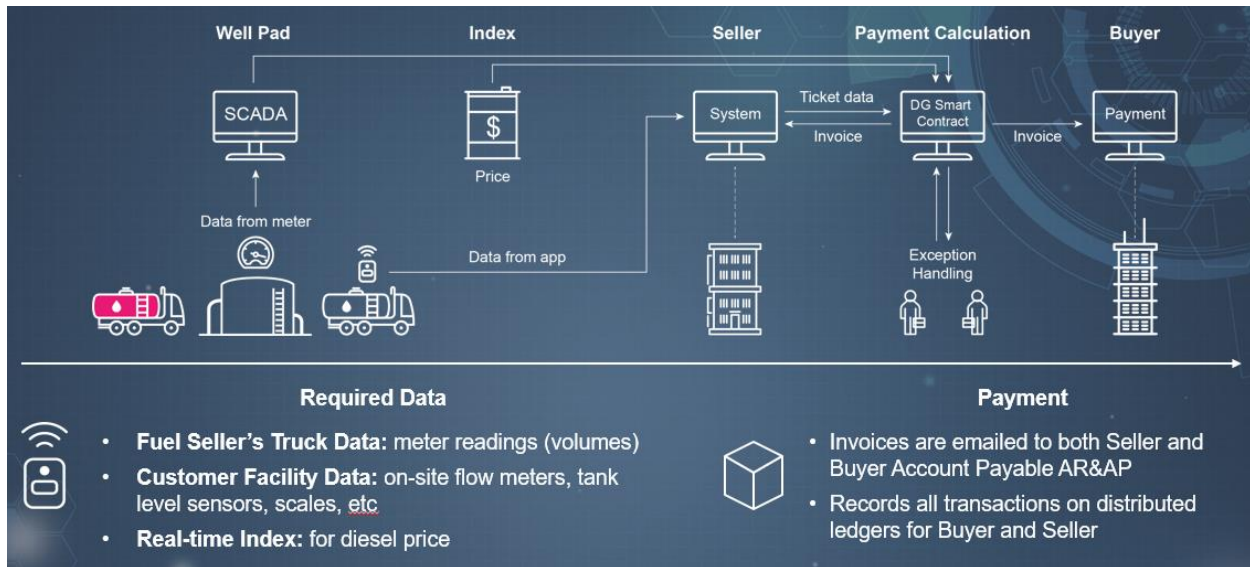

Target Audience

Designed for buyers and haulers of diesel to automate ticket approval and invoicing, this contract relieves administrative burden on both sides, and enables more automated accounting and cost allocation for buyers.

Features & Benefits

- Integrates to any field ticketing, middleware or invoicing system via API
- Integrates to any SCADA / IOT system via API
- 95% reduction in manual processing time for tickets and invoices on both sides
- Runs nightly to provide finality every 24 hours rather than every 2-4 weeks
- Supports automated cost coding to buyer accounting and production systems
- Outputs can be pushed to ERP and other enterprise systems via API

How It Works
